The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action. The RCE filed is accepted.

Claims 196-198 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. These claims describe, rather than limit, the other claims.

Claims 164, 166, 170-174, 196-198 are rejected under 35 U.S.C. 102(a) and (b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kiang et al. J. Phys. Chem.

The reference teaches on pg. 3750 cut nanotubes. SWNTs are depicted, however the discussion is general. In so far as claims 173, 174 require anything beyond nanotubes, then using SWNTs in a battery/fuel cell is an obvious expedient to exploit their electrical properties.

Applicant's arguments filed 8/4/06 have been fully considered but they are not persuasive.

Even though Kiang does use the same verbiage, it appears that the claimed elements are taught. Claim 164 does not require plural wires on a device and if amended to do so would be restricted. The right paragraph of pg. 3749 appears to describe a homogeneous product; applicant should show differences.
